

# Case Presentation – Neville Transforming Care London Provider Workshop 14th November 2016

Heidi Emery

MHLD Placement Coordinator

MHLD Placement Monitoring Team

South London and Maudsley NHS Foundation Trust

# Aggressive or dangerous behaviour.....

- First Hospital admission age approx 16 years
- Community placement near to home age 17 years
- Medium security hospital transfer from acute local admission age 18 years
- Transfer to low security age 19
- Community placement out of area connected to the previous hospital age 21
- Low secure hospital age 25, removed due to unsafe and non-progressive care
- Low secure transfer to known provider age 28
- Low secure transfer to known provider due to funding age 31
- CTR instigated change in diagnosis and plan to move to the community age 35
- Moved to community to a placement in the neighbouring borough to his originating borough age 36

# CTR January 2015

- Promoted the change of diagnosis due to all the panel being autism experts.
- Identified an autism specific assessments and required care plans
- Assisted the community team to focus on the right community placements
- Assisted the hospital to gain a different focus on the challenging behaviour

# Planning the move

- Agreed to move closer to originating borough
- Assessed by more than 3 providers
- Best Interest process was crucial to the choice of placement and tested all professionals advanced empathy and support to make the right decisions.
- Best Interest process used emails and meetings to ensure family involvement.
- Sister saw her first choice and agreed placement and could not believe it was possible for her brother to live in a 'home'

# The Chosen Placement (1):

- Already connected with local MHL D services
- Local GP is the LD lead for London
- Testimony of carers of other service users
- Staff and Residents longevity and mix
- Management of a service user with a similar physical health need
- Culturally appropriate
- Positive risk taking
- Listening to the resident

# The Chosen Placement (2):

- Physical environment, spacious inside and room for table tennis table
- Adaptation with room
- Simple approach/no over complicating/trying to be something it is not
- Staff matching to the service user
- Good transition and collaboration with local team, creative in adapting existing activities
- Persistence
- Recognised quick wins such as I T requirement.
